

Dateline: **29th September 2010**

Venue: **Furzton Lake**

THE BREAM MACHINE STRIKES AGAIN

The weather forecast for today was 'Wild Wet and Windy' (Oh why oh why do we listen?) and Furzton being so open to the elements it was only wise to leave the poles at home and join the army of feeder hopefuls. Now not being one to complain (much) the day turned out to be lovely and ideal for the pole but with the stall set out for feeder, one must persevere!

A good turn out for this match saw many hopefuls aiming to get amongst the bream and inevitable coin. Early reports confirmed the inevitable that our 'Bream machine' Terry Lancaster was setting the pace with 4 large skimmers from his peg in the trees before the overshot and John (White Boilee Man)Harvey was admitting to one proper job and two smaller samples after 2 hours. One exception was Dick Peerless who had a couple of decent Roach on feeder fished pellet and Ron Dorril who has a record of catching well here was cursing his luck after losing a double figure Carp at the net. After a slow start, Austin Maddock found that his patience was being rewarded with a couple of decent sized skimmers and Jack Wilson on the duck swim was also getting his net wet with the odd skimmer. Steve Shubert changed baits and had to chase his feeder rod as a decent bream grabbed his boilee and made off for its Island refuge!

So, for the results, as predicted pre match, there were no surprises and one can only hope for half the knowledge that our best anglers have acquired over the years.

1 st	Terry Lancaster	26lbs 10ozs
2 nd	John Harvey	17lbs 12ozs
A Section	Jack Wilson	10lbs 7ozs
B Section	Austin Maddock	8lbs 8ozs

Next week we have our first visit to Calverton Road and with the chance of rain, we should have an interesting match.

Oh and by the way, The CSSC National on the Trent did not go exactly to plan as a less than favourable draw on a very clear and dour river only gave us only one good peg (gave Dave Smee 3rd individual) and we fell short of a medal by just 3 points. Those who fished on the preceding 2 days found only minnows feeding and one section was won with 51/2ozs !! Tells you everything. – Ah well there's always next year!!
